COMMERCIAL 3 HOURS CORE**

MICHIGAN

3.5 HRS CEU

INDIANA

2 HRS CAT 1, 2 HRS RT CCH's

ORGANIZED BY:

**OSU Extension Fulton County
Maumee Valley Extension Education
Research Area**

The *Sprayer Demonstration & Technology Day* is focused on providing farmers and other applicators an updated look at efficient and effective application equipment and techniques. Whether a new sprayer is in your farm's future or you are looking to get a few more years out of your current sprayer, you will find some hints and tips to get the most out of your spray applications.

- ◆ Save money with an efficiently operating sprayer.
- ◆ Assure your sprayer is delivering the correct amount of herbicide, insecticide and fungicide product in each spray pass.
- ◆ Spray drift is still a problem. All technologies to reduce spray drift will be discussed and demonstrated.
- ◆ Innovations in sprayer design and new sprayer components are available for improved applications. The new technology will be displayed and demonstrated at this field day.
- ◆ Provide an opportunity to growers to see a collection of spray equipment and accessories at the same site, and dialog with the equipment representatives.

Please see the back of this flyer for program details and a listing of the displays, exhibitors and sponsors for this event.

Details for the day!
